RELATION-SCHEMA

NORMALIZATION PROOF

RELATION:- EMPLOYEE

KEY: Emp_id

Minimal FD set:

Emp_ID \rightarrow name
Emp_ID \rightarrow shift
Emp_ID \rightarrow salary
Emp_ID \rightarrow hir_date
Emp_ID \rightarrow DOB
Emp_ID \rightarrow City
Emp_ID \rightarrow State
Emp_ID \rightarrow SID
Emp_ID \rightarrow super_empid

\rightarrow In every FD set of the relation, {Emp_ID} is a super key. Therefore, the EMPLOYEE Relation is in BCNF.

RELATION:- EMP_EMAIL

KEY:{Email_id,Emp_id}

\rightarrow There is no FDs. {Emp_ID,Email_id} is a key. Therefore, the EMP_Email Relation is in BCNF.

RELATION:- SECTION

KEY:{SID}

Minimal FD set:

SID \rightarrow sname
SID \rightarrow mgr_empid

\rightarrow In every FD set of the relation, {SID} is a super key. Therefore, the SECTION Relation is in BCNF.

RELATION:- BILL

KEY: Bill_id

Minimal FD set:

Bill_ID \rightarrow Date
Bill_ID \rightarrow Cust_ID

\rightarrow In every FD set of the relation, {Bill_ID} is a super key. Therefore, the BILL relation is in BCNF.

RELATION:- CUSTOMER

KEY: Cust_ID

Minimal FD set:

Cust_ID \rightarrow mobile_no
Cust_ID \rightarrow Cust_name
Cust_ID \rightarrow payment_mode

\rightarrow In every FD set of the relation, {Cust_ID} is a super key. Therefore, the CUSTOMER Relation is in BCNF.

RELATION:- WARRANTY

KEY: warranty_ID

Minimal FD set:

warranty_ID \rightarrow service_provider
warranty_ID \rightarrow warranty_period
warranty_ID \rightarrow item_code

\rightarrow In every FD set of the relation, {Warranty_ID} is a super key. Therefore, the WARRANTY relation is in BCNF.

RELATION:- RETURN_POLICY

KEY: Return_id

Minimal FD set:

Return_ID \rightarrow refund_percent
Return_ID \rightarrow item_code

\rightarrow In every FD set of the relation, {Return_ID} is a super key. Therefore, the Return_policy relation is in BCNF.

RELATION:- OFFERS

KEY: {start_date,end_date,item_code}

Minimal FD set:

{start_date,end_date,item_code} \rightarrow Discount_percent

\rightarrow In every FD set of the relation, {start_date,end_date,item_code} is a super key. Therefore, the OFFERS relation is in BCNF.

RELATION:- ITEM

KEY: Item_id

Minimal FD set:

Item_code \rightarrow item_name
Item_code \rightarrow stock
Item_code \rightarrow selling_price
Item_code \rightarrow purchase_price
Item_code \rightarrow SID

\rightarrow In every FD set of the relation, {Item_code} is a super key. Therefore, the ITEM relation is in BCNF.

RELATION:- SUPPLIER

KEY: supplier_name

Minimal FD set:

supplier_name \rightarrow city
supplier_name \rightarrow state
supplier_name \rightarrow point_of_contact

\rightarrow In every FD set of the relation, {Supplier_Name} is a super key. Therefore, the Supplier relation is in BCNF.

RELATION:- ORDER_DETAILS

KEY: order_id

Minimal FD set:

Order_id \rightarrow supplier_name
Order_id \rightarrow item_code
Order_id \rightarrow quantity_ordered
Order_id \rightarrow order_date
Order_id \rightarrow arrival_date
Order_id \rightarrow purchase_price

\rightarrow In every FD set of the relation, {Order_id} is a super key. Therefore, the ORDRE_DETAILS relation is in BCNF.

RELATION:- Bill_details

KEY: {Bill_id,Item_code}

Minimal FD set:

{Bill_id,Item_code} \rightarrow quantity

\rightarrow In every FD set of the relation,{Bill_id,Item_code} is a super key. Therefore, the Bill_details is in BCNF.

RELATION:- SUPPLIER_EMAIL

KEY:{Email_id,Supplier_name}

→ There are no FDs. {Supplier_name,Email_id} is a key. Therefore, the SUPPLIER_EMAIL Relation is in BCNF.
